Upon delivery, payment will enter Global Payments workflow allowing for approvals, repair, and release.</li> </ul>		
Citibank	<a href="https://sandbox.dev.citi">https://sandbox.dev.citi</a>	<ul style="list-style-type: none"> <li>- The Accounts API lets you retrieve account and transaction data for Citi Customers who have authorized your app. In most cases, you'll want to request a summary of all accounts first, which will return basic account information and account IDs. Once you have this information, you can request additional account details and/or transactions.</li> <li>- The API can return information for cards, checking, savings and brokerage accounts. Citi is working on extending this API to return other types of accounts like mortgages and loans.</li> </ul>	<ul style="list-style-type: none"> <li>- Within the Accounts APIs.</li> </ul>	<ul style="list-style-type: none"> <li>- Authorize is Citi's implementation of the OAuth 2.0 framework. It enables secure authorization using standard methods that can easily be integrated in a third-party app.</li> </ul>		<ul style="list-style-type: none"> <li>- The Pay with Points API allows Citi customers to use their Citi Points to pay for all or part of a transaction on third-party apps. To simplify integration, transaction payments are processed through apps' existing payment gateway. A matching statement credit is then applied to the customer's Citi account, usually within 1-3 days.</li> </ul>		
Capital One	<a href="https://developer.cap1">https://developer.cap1</a>	<ul style="list-style-type: none"> <li>- The Bank Account Starter API provides the ability to open a new 360 Savings Account, 360 Money Market Account, or 360 Certificate of Deposit (CD). Customers can apply for an individual account or a joint account (up to two applicants). And you have full control over how the application is presented.</li> <li>- Retrieve account products and details — get a full list of all supported deposit products, their product IDs, and details for specific accounts.</li> <li>- Create new account application — submits an end-user's application for a new 360 Savings Account, 360 Money Market Account, or 360 CD. This endpoint also provides the ability to fund the account instantly using ACH.</li> <li>- Retrieve/answer out of wallet questions — provides secondary validation for users whose identity needs additional verification using Capital One's out-of-wallet capabilities.</li> <li>- Retrieve account application details — retrieves detailed information about an application.</li> <li>- Once the account is created, your users should be directed to the Capital One 360 website to configure their online access and manage their day-to-day banking.</li> </ul>	<ul style="list-style-type: none"> <li>- Within the Bank Account Starter API.</li> </ul>	<ul style="list-style-type: none"> <li>- Within the Bank Account Starter API.</li> </ul>		<ul style="list-style-type: none"> <li>- A key feature of most Capital One credit cards is the associated loyalty, or Rewards, program. You can use the Rewards API to get a list of all rewards accounts associated with a named customer, and to obtain a set of details about a specific rewards account (including balance, currency, and the available redemption opportunities).</li> </ul>
